

IN THE CLAIMS

Please amend the claims as follows:

1. (Currently amended) A method for inputting data into a predetermined directory in [[of]] a wireless device, wherein the wireless device is in communication with a server through a wireless communication network, comprising the steps of:

receiving, from the wireless device, a custom data locator request from the wireless device; for an telephone address book entry, said entry comprising an identification for a destination party;

retrieving [[a]] custom data comprising a telephone number for the destination party from a database directory;[[,]] the custom data being associated with the custom data locator request;

receiving a download request from the wireless device; and

transmitting the custom data to the wireless device, wherein the custom data is stored in the predetermined directory in [[on]] the wireless device.

2. (Canceled)

3. (Currently amended) The method of claim 1, [[2,]] wherein the identification comprises [[is]] a name.

4. (Currently amended) The method of claim 1, [[2,]] wherein the identification comprises [[is]] an address.

5. (Currently amended) The method of claim 1, [[2,]] wherein the identification comprises [[is]] an electronic mailing address.

6. (Currently amended) The method of claim 1, ~~wherein the custom data is a telephone number, and further comprising: the step of~~

connecting the wireless device with the telephone number..

7. (Currently amended) The method of claim 1, wherein the custom data further comprises ~~[[is]]~~ an electronic mailing address.

8. (Currently amended) The method of claim 1, wherein the custom data further comprises ~~[[is]]~~ a set of geographical directions.

9. (Currently amended) The method of claim 1, wherein the custom data further comprises ~~[[is]]~~ a street address.

10. (Original) The method of claim 1, wherein the predetermined directory is created on the wireless device when the custom data is received at the wireless device

11. (Currently amended) The method of claim 1, further comprising: ~~the steps of:~~
receiving a caller identification associated with the wireless device; and
sending a download inquiry to the wireless device.

12. (Currently amended) The method of claim 11, further comprising: ~~the step of~~
recording a charge associated with the download request to an account associated with the wireless device.

13. (Currently amended) A method for inputting data into a predetermined directory in ~~[[of]]~~ a wireless device~~[[,]] wherein the wireless device is~~ in communication with a server through a wireless communication network, comprising: ~~the steps of:~~

sending to the server a custom data locator request for an telephone address book entry, said request comprising an identification for a destination party; ~~to the server;~~

receiving [[a]] custom data comprising a telephone number for the destination party ~~download inquiry~~ from the server; and

~~sending a download request to the server;~~

~~receiving a custom data from the server; and~~

storing the custom data into the predetermined directory~~[[.]]~~ of the wireless device.

14. (Canceled)

15. (Currently amended) The method of claim 13, ~~[[14,]]~~ wherein the identification comprises ~~[[is]]~~ a name.

16. (Currently amended) The method of claim 13, ~~[[14,]]~~ wherein the identification comprises ~~[[is]]~~ an address.

17. (Currently amended) The method of claim 13, ~~[[14,]]~~ wherein the identification comprises ~~[[is]]~~ an electronic mailing address.

18. (Currently amended) The method of claim 13, ~~[[14,]]~~ further comprising: ~~the step of~~
sending a request ~~requesting~~ to connect to the destination party via the wireless communication network after receipt of the custom data.

19. (Currently amended) The method of claim 13, further comprising the step of creating an address book entry in the predetermined directory for storing the custom data.

20. (Original) The method of claim 13, wherein the step of sending a custom data locator request to the server occurs from a resident application at the wireless device.

21. (Currently amended) An apparatus for receiving ~~[[a]]~~ custom data from a server via a wireless communication network and storing the custom data in a predetermined directory in the apparatus, comprising:

a means for transmitting, to the server, a customer data locator request for an telephone address book entry, said entry comprising an identification for a destination party; an identification of a custom data to the server;

~~means for receiving a custom data download inquiry from the server;~~

~~means for sending a custom data download request to the server;~~

a means for receiving the custom data comprising a telephone number for the destination party from the server; and

a means for storing the custom data in a predetermined directory~~[[.]]~~ of said apparatus.

22. (Currently amended) The apparatus of claim 21, further comprising:

a means for creating an entry in the predetermined directory for the custom data.

23.-25. (Canceled)

26. (Currently amended) An apparatus, ~~for receiving a custom data from a server via a wireless communication network and storing the custom data in a predetermined directory in the apparatus,~~ comprising:

a wireless telephone interface, for communicating with a wireless network;

a storage device, said storage device having at least a predetermined directory, and for storing an address book, said address book having at least one entry in said predetermined directory; and

a controller, coupled to and for controlling said wireless telephone interface and said storage device;

wherein said controller is configured to

send a custom data locator request for an telephone address book entry, said request comprising an identification for a destination party, to the server,

receive custom data comprising a telephone number for the destination party from the server; and

store the custom data into the predetermined directory of said apparatus.

~~a wireless telephone interface that transmits an identification of a custom data and a custom data download request to the server and receives a custom data download inquiry and a custom data from the server;~~

~~a controller that controls the wireless telephone interface; and~~

~~a custom data directory;~~

~~wherein the custom data is stored by the controller.~~

27. (Currently amended) A computer readable medium tangibly storing a sequence of instructions, on which is stored a computer program for receiving a custom data from a server via a wireless communication network and storing the custom data in a predetermined directory in a computing device, the computer program comprising instructions, which when executed by a [[the]] computing device, causes the computer device to perform[[s]] the steps of:

receiving, from a wireless device over a wireless network, a custom data locator request for an telephone address book entry, said entry comprising an identification for a destination party;

retrieving custom data comprising a telephone number for the destination party from a database directory;

receiving a download request from the wireless device; and

transmitting the custom data to the wireless device, wherein the custom data is stored in the pre-determined directory in the wireless device.

~~transmitting an identification of a custom data to the server;~~

~~receiving a custom data download inquiry from the server;~~

~~sending a custom data download request to the server;~~

~~receiving the custom data from the server; and~~

~~storing the custom data in a predetermined directory.~~

28. (Canceled)

29. (Currently amended) The computer readable medium ~~program~~ of claim 27, ~~[[28,]]~~ wherein the steps further comprise: ~~further performing the step of~~

requesting to connect to the destination party via the wireless communication network after receipt of the custom data.

30. (Currently amended) The computer readable medium ~~program~~ of claim 27, wherein the identification comprises ~~[[is]]~~ a name.

31. (Currently amended) The computer readable medium ~~program~~ of claim 27, wherein the identification comprises ~~[[is]]~~ an electronic mailing address.

32. (Currently amended) The computer readable medium ~~program~~ of claim 27, wherein the identification comprises ~~[[is]]~~ an address.

33. (Currently amended) The computer readable medium ~~program~~ of claim 27, wherein the steps further comprise:

~~further performing the step of~~ creating an entry in the predetermined directory for storing the custom data.
